ENTRY LEVEL CYBER SECURITY SPECIALIST / SOFTWARE ENGINEER

Emerging professional with related hands on training and education in monitoring and implementing cybersecurity protocols to detect security events and identify potential vulnerabilities, while devising solutions to maintain a secure IT environment.

~ ***Qualifications Profile***~

- ***IT Security Management*:** Trained to develop and support robust IT security procedures; capable of conducting system and application vulnerability assessments and information security audits to ensure compliance with SOC security policies.
- **Software Solutions:** Skilled in following Software Development Life Cycle (SDLC) process to complete a variety of software development projects, meeting all project deadlines and on-time release of all deliverables.
- ***Creative Problem Solver*:** Talent for quickly learning new technologies and support methodologies, applying solutions to ensure all operations comply with defined IT Security Compliance process and procedures.

~ ***Core Competencies*** ~

Cyber Threat Analysis • Network Security Design • Application/Program Creation • Software Engineering • Data Management Waterfall/Agile Scrum Project Management • Digital Forensics & Penetration Testing• File Management • Systems Programming

EDUCATION

TEXAS A&M UNIVERSITY, College Station, Texas
Bachelor of Science in Computer Science/Minor in Cyber Security - GPA: 3.6/4.0 (Graduating: May 2026)

Technical Skills:

Certifications:	CompTIA Security+ Certified - #:TJ6CHK2Y9BFQ5DRJ (08/2025)
Platforms:	Windows (Command-Line), Linux, UNIX, Windows VM
Applications:	Linux, Git, MySQL, PostgreSQL, Docker, Node.js, REACT.js, AI/ML
Languages:	C++, Python, Java, C#, SQL, JavaScript, and HTML

Career Experience

Computer Science / Cyber Security Student, TEXAS A&M UNIVERSITY, College Station, Texas 08/2022 to Present

Gaining hands-on training and practical experience in mastering software development processes and understanding complex applications, algorithms, data structures, information architecture, and system design methodologies.

Key Projects & Accomplishments:

- *Capstone Project:* Currently heading the development of a web application that uses AI recommendation engine to match users with various local volunteer opportunities using React Native.
- *Triply: Project that won Best UI/UX at Tidalhack Spring 2026; Used React and Expo Go to create a mobile application using Google Gemini to help create and manage trips. Used a Fast API Python Backend to manage chats, trips, and users.*
- *Attack Vector Analysis*: Provided detailed review of various cyber security attacks such as XSS, Buffer Overflow, Padding Oracle, etc.; created/utilized safe environment to replicate the attacks and created new code to project the systems.
- *Script Killer*: A cybersecurity multitool that combines existing open sourced scanning tools to complete vulnerability scans across popular languages like Python and C++; Found over 80% of vulnerabilities in test code generated by AI.
- *Real World SaaS Development*: Created and coded a web-based Point of Sale (POS) system following Agile Method to implement an efficient Back-End that properly handled user authorizations and allowed multiple users to order at the same time and interface front-end; worked with 7 member testing team to try to "break" into the system.

Associations / Work Experience:

- *Mentor - FIRST Robotics, Team 1296* (08/2022 to 04/2023): Headed the training of 25+ students in programming robotic systems, attending multiple competitions; served as Agile Scrum project manager in coordinating all project task/goals.
- *VP of Software / Team Lead & Member - FIRST Robotics* (08/2018 to 06/2022): Utilized programming skill in C++ and Java to code robotic systems; engineered robot's real time automatic targeting system that allowed robot to successfully shoot projectiles and hit the target while moving 10 mph 85% of the time and nearly 100% when stopped.
- *Customer Sales Associate – Best Buy (10/2020 to 12/2020): Learn a*bout various appliances; Worked with customers to assist them as needed. Manage online orders and restock the store as needed.
